Subject: Re: Groundwater Flow Direction Near Nekoosa Wisconsin

Hi Jenny -

I think I know what this is about, and that we'd benefit from talking. I should be in after 8:30. 715-346-2984.

Groundwater flow direction does not change appreciably over time in these sorts of settings.

Hi George,

I am an engineer at EPA in the Chicago office and I have a copy of the paper that you wrote with Will Stites in 2003 titled, "Nitrate impacts on groundwater from irrigated-vegetable systems in a humid north-central US sand plain". That paper shows a general groundwater flow arrow for the central sands region, but I wondered if you have more recent groundwater flow direction information than 2003. If you do, may I have a copy of that paper or information? I am looking for the groundwater flow near Nekoosa, Wisconsin.

Thank you,
Jenny
